CombiForce 515

Technical Data Sheet

PIS – VERSION:1 -03.2025

Product Description Overview:

CombiForce 414 is a mineral supplement formula containing the **"full ring – real chelate"** combination of zinc, manganese, iron, copper, iodium and Selenium. CombiForce 414 provides a superior trace mineral supplementation in a powder form which brings unique advantages.

What's in it:

Composition:

3b607 Zinc (Zinc chelate of Glycine, hydrate)	50000 mg/Kg
3b413 Copper (Copper chelate of Glycine, hydrate)	10000 mg/Kg
3b506 Manganese (Manganese chelate of Glycine, hydrate)	50000 mg/Kg
3b108 Iron (Iron chelate of Glycine, hydrate)	20000 mg/Kg
3b203 Iodine (Coated granulated calcium iodate, anhydrous)	5000 mg/Kg
3b812 Selenium (Selenomethionine produced by Saccharomyces cerevisiae CNCM I-3399)	400 mg/Kg

Carrier:

Calcium carbonate up to 1Kg

Feeding Instructions:

Feed as a component in the preparation of feed stuff or premixes. The product shall be incorporated into feed following the maximum percentages in accordance with EU Regulation.

Ruminants:	Maximum dosage 0.1% of complete feed
Poultry:	Maximum dosage 0.12% of complete feed
Other Species:	Maximum dosage 0.12% of complete feed

For a correct use it is recommended to follow the directions of an expert nutritionist.

Features:

- Appearance: pale blue powder.
- Packaging: 25kg bags on pallet.
- Storage: Store in original closed packaging and in a cool, dry place.
- Shelf life: Best use before 24 months after production date.
- Method of production: Mixing.

Other statements:

- Labelling instructions and applications: Complementary feed all animal species.
- Details of undesirable substances: It respects the maximum levels of undesirable substances contained in the Directive (EC) 32/2002 as amended.
- GMO: not labelling required.
- Animal origin substances: absent.
- For countries outside the EU, please check that the recommendations of use are compliant with local regulations.
